

Taylor & Francis Archives complement current content in libraries and allow researchers to explore centuries of academic excellence across 28 key subject disciplines.

We have **MORE THAN 65** Nobel prize winning authors' research in our Classic Archive content – with **OVER 450** of their articles

IN THE PAST

YEARS

Mentioned on Twitter over **13,800** times!

Mentioned on Facebook over **1,100** times!

Mentioned by News Outlets over **1,700** times!

Our journals have been cited **1,300,000+** times!

Since 1980, research from our Classic Archive has influenced

**OVER 11,000** government policy documents [ **AND** ] **OVER 27,000** patents

Our Most Cited Classic Archive Journals:

Philosophical Magazine  
**127,311**

Journal of the ASA  
**80,451**

Journal of Natural History  
**66,508**

Technometrics  
**20,868**

Molecular Physics  
**19,787**

Our Most Cited Classic Archive Articles over the last five years:

**5,705** LIII. On lines and planes of closest fit to systems of points in space, 1901

**5,105** XCII. Relations between the elastic moduli and the plastic properties of polycrystalline pure metals, 1954

**4,324** The Satisfaction With Life Scale, 1985

**3,365** Nonparametric Estimation from Incomplete Observations, 1958

**2,752** The calculation of small molecular interactions by the differences of separate total energies. Some procedures with reduced errors, 1970

The Classic Archive features content published before 1997, back to the journal's very first volume where available.
